Red	63.5%	0.0%
Smoke Gray	6.9%	0.0%
Winestone	38.1%	0.0%
Chestnut	47.3%	0.0%

The recycled content was determined based on the guidelines in the LEED™ Green Building Rating System, in consideration of ISO 14021 Environmental Labels and Declarations, and according to the Policy on Certifying Brick as an Environmentally Preferable Product of the Brick Industry Association. These results are the culmination of data supplied by the manufacturer, an BML technical review and Plant site Audit. This certification is subject to an annual renewal based on an audit of the Company's environmental practices. This certification was prepared under the service testing function of the Bishop Materials Laboratory, and it solely represents the professional opinion and practice of the undersigned.

CERTIFICATION

John Sanders, Ph.D., PE., Associate Director of Operations
